

HENRIQUE ROCHA BOMFIM

COMPUTER ENGINEERING STUDENT

PROFESSIONAL OBJECTIVE

Computer Engineering student with a strong background in software development, system optimization, and automation. Proven track record of delivering high-impact solutions in global environments and the financial sector. Passionate about bridging the gap between complex technical architectures and real-world business value, with a constant focus on scalability, performance, and user impact.

PROFESSIONAL EXPERIENCE

Founder & Tech Lead | Startellite | Startellite

Sao Paulo - Brazil

Feb 2026 - Present

- Architect and develop a B2B SaaS-enabled marketplace connecting early-stage founders with elite, pre-vetted software engineers to accelerate product development.
- Engineer a proprietary "Fair Rate Index™" algorithm using TypeScript, implementing a weighted scoring system based on academic background, experience, and validated tech stacks to standardize hourly rates.
- Build the end-to-end platform infrastructure utilizing Next.js 15, Tailwind CSS v4, and Supabase, implementing strict Role-Based Access Control (RBAC) for distinct Founder and Developer dashboards.
- Design and integrate asynchronous technical vetting workflows (GitHub PR validations and Proof of Work checks) to guarantee elite engineering standards for incoming startups.

Software Engineering Intern | BASF

Global HQ, Ludwigshafen, Germany

Oct 2025 - Feb 2026

- Led digital transformation of global R&D predictive pipeline, replacing legacy MATLAB systems with scalable, dependency-free Web App technology on their internal system.
- Delivered **20x efficiency gain**, reducing chemical prediction processing time **from 5 minutes to 15 seconds** and accelerating innovation cycles by democratizing analytics access **for engineers worldwide**.

Software Engineering Summer Intern (IT Funds) | BTG Pactual

Sao Paulo - Brazil

Jan 2025 - Jan 2025

- Designed and deployed **full-stack automation scripts** for auditing and account closing, generating a proven **saving of 42 hours/month** for the analytical team.

LEADERSHIP & TEACHING EXPERIENCE

Teaching Assistant (Software Design) | Insper (Feb 2025 – Jun 2025)

- Selected as official paid Teaching Assistant, delivering in-person and remote coaching to 50 first-semester Computer Engineering students (4 hours/week).
- Translated complex Python and software architecture concepts into clear, actionable best practices, driving students' technical growth and academic success.

Volunteer Python Instructor | GAS Insper (Aug 2022 – Jun 2026)

- Designed and taught weekly Python and Web Dev classes, democratizing tech education for ~100 low-income students.

President | Insper Code (Tech League) (Aug 2022 – Jun 2025)

- Led the university's main tech league, scaling the team by >400% (9 to 46 members) and managing the software project portfolio using agile methodologies.

EDUCATION

Insper

B.S. in **Computer Engineering**

Feb 2022 – July 2027 (Expected Graduation)

- Brazil, São Paulo, São Paulo

THI (Technische Hochschule Ingolstadt)

Sep 2025 – Feb 2026

- Germany, Bayern, Ingolstadt
- Academic Exchange focused on AI & Software Security.

LANGUAGES

- Portuguese (Native)
- English (Fluent/C1) | German, Spanish & Japanese (Basic)

HARD SKILLS & TECH

- **Data & Analytics:** Python, R, SQL (MySQL), Pandas, Power BI, Machine Learning.
- **Industry 4.0, IoT & Cloud:** C/C++, AWS (Serverless/Lambda), Docker, Terraform, Linux.
- **Software Architecture:** JavaScript (React), Java, Data Structures & Algorithms, Git, GenAI.

HONORS & AWARDS

- **Impact Trajectory Scholar (Insper, 2025):** Top 0.5% of scholarship students (1/400) for academic excellence and 642 extracurricular hours.
- **Ismart Excellence Scholar (2019-2026):** Full-ride scholarship awarded for academic excellence (Top 1% of applicants)
